

Architectural Designs

Add flair to any building décor with GAL's customized designs.

Unique architecturally demanding projects require the expertise, craftsmanship, and attention to detail that GAL brings to all our product offerings.

Our years of experience and technical expertise ensure that beauty and functionality are joined in perfect balance for every fixture we produce. Often jointly created with building owners and architects, we offer unparalleled designs which when combined provide a unified and distinctive look for every project.

Sophisticated engineering and manufacturing capabilities, from three dimensional computerized conceptual drawings to state-of-the-art programmable machines and laser cutting systems, provides us the flexibility to turn any design concept into reality.

The following section provides an overview of a variety of architectural fixtures and manufacturing capabilities available from GAL. Special cover profiles, layered materials, combination finishes and engraved patterns are a few of the concepts which can add an extra touch of elegance to any building.

Complementing our customized covers, we are also featuring a classic handicap Braille plate and five stunning pushbutton designs.

**Beauty and function,
GAL's unbeatable combination**
