

# Conversion Kit: QKS14/QKS15 to MOVFE-HH

## PRE-ENGINEERED GAL CONVERSION BOLT ON KIT for the QKS14 and QKS15 Harmonic Series Operators

In the past ECI (now GAL Canada) provided the mechanical components for the QKS14 and QKS15 operators. Now, GAL has put together a kit to replace these obsolete operators with our MOVFE-HH Harmonic operator.

This kit provides all parts needed for an installation. Customers only need to order (1) part number to receive all necessary components.

### BENEFITS

- Identical mechanical profile to the existing operator
- New kits are built on a universal standard, non-proprietary platform (MOVFE-HH)
- CSA/UL Certified where applicable
- Used on the QKS14 and QKS15 Operator Series found on MICONIC A, MPH2 and 300A controllers
- Only specify the operator and hand - **no surveys!**
- Wiring Diagrams included
- Each kit includes an easily learned programming tool and software
- These kits allow the retention of the existing header, tracks and hangers, clutch and interlocks
  - Replacement clutch and interlocks can be added upon request
- New drive arms are more robust
- Smoother and quieter operation

## MODERNIZATION KITS

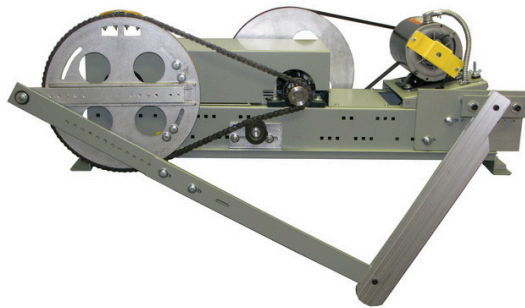

### SIDE SLIDE KITS

- **KIT03-4001L** - QKS14/15 to MOVFE-HH SS/2S KIT, 115 Volts
- **KIT03-4001R** - QKS14/15 to MOVFE-HH SS/2S KIT, 115 Volts

### CENTER PARTING KIT

- **KIT03-4003N** - QKS14/15 to MOVFE-HH CP KIT, 115 Volts

## CONTENTS OF EACH KIT

**MOVFE-HH OPERATOR 115V  
W/ UNIVERSAL LENGTH DRIVE ARM**  
(Side Slide Shown, Center Part Similar)

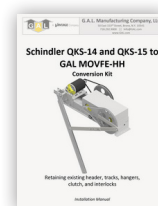

**DRIVE ARM PIVOT BRACKETS**  
(Center Parting Only)

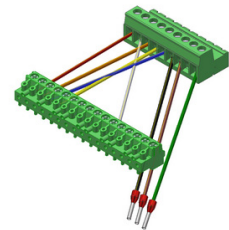

**6 AMP FUSES**

**PARAMETER  
UNIT**

**INSTALLATION  
MANUAL**

**WIRING HARNESS,  
TDC/TRX5 BOARD  
TO MOVFE-HH**
