CONTENTS

1. Introduction 1
2. Mounting Bracket Setup 2

1. Introduction

With the GAL conversion kit, the modernization of the **OTIS AT- 400** or **Blackbelt Operator** with Discrete Communication is simplified by having the **MONXT- OMNI Operator** capable of suiting any door opening voltage or hand and this Kit provides you two options to drive your doors.

The hanger mount bracket will allow you to drive your doors directly from the OTIS Hanger without having to drill your doors.

2. Mounting Bracket Setup

- **MONXT OMNI Door Drive Bracket** (Figure 1)

Using this configuration, please refer to the MONXT-OMNI Installation Guide.

MONXT OMNI

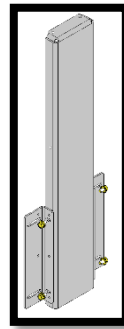

Figure 1

- **Hanger Mount Bracket** (Figure 2)
 1. Following the MONXT-OMNI manual, make sure the location of belt clamp will not interfere with any obstruction on the Otis hanger.
 2. Attach the belt clamp assembly to the mount bracket.
 3. Attach the Hanger mount bracket to the OTIS hanger by using four #10 self-tapping screw. (Hardware included)
